Profile Summary

Full-Stack .NET Developer with **3.5+ years** of professional experience designing and delivering scalable, cloud-native applications using **.NET Core 8, C#, React.js, Angular, Azure**, and **Microservices** within Agile environment.

Technical Skills

Languages: C#, TypeScript, JavaScript (ES6+), SQL, LINQ, HTML5, CSS3/SCSS

Backend: .NET Framework, .NET 6/7/8 Core, ASP.NET Core Web API, ASP.NET Core MVC, EF Core, CQRS/MediatR, JWT/OAuth2, Redis, RabbitMQ, Polly, NUnit/xUnit

Frontend: React.js (Hooks, Redux Toolkit, React Query, Code Splitting), Angular (RxJS, NgRx, Lazy Loading, Guards), Bootstrap, Material-UI, Jest/Jasmine

Cloud (Azure): App Services, Functions, Service Bus, Blob Storage, API Management, Application Insights, Cosmos DB, AKS, Container Registry, Key Vault, Monitor, Log Analytics, Active Directory / Entra ID, Managed Identity

DevOps & IaC: Azure DevOps, Azure Pipelines, GitHub Actions, CI/CD, Docker, Docker Compose, Kubernetes, Helm, kubectl, Terraform, Bicep, Git, Linux, PowerShell, Bash, YAML, Prometheus, Grafana

Database: SQL Server, PostgreSQL, MySQL, Stored Procedures, Indexing Strategies, Execution Plans, Query Optimization, Performance Tuning

Architecture: Clean Architecture, Microservices, Event-Driven Architecture, SOLID, DDD, API Versioning, RBAC, REST/OpenAPI, IaC

Work Experience

Software Engineer — Full-Stack .NET Developer

Jan 2023 – Present

In Time Tec

Jaipur, Rajasthan

ITT Racknap

.NET Core 8 · React.js

- Developed a **multi-tenant B2B SaaS** platform with **RBAC, JWT, OData** filtering, and a **JSON-driven workflow engine** for vendor orchestration across Microsoft NCE, Azure, and Acronis, cutting onboarding time by **50%**.
- Applied **Clean Architecture** and **Microservices** with **Polly** resilience policies and per-tenant **Azure Blob Storage** isolation, accelerating feature delivery by **30%**.

Troy Group

.NET Core 8 · React.js

- Built a high-throughput **PDF processing engine** with watermarking, redaction, QR/barcode generation, and Arabic RTL rendering, reducing memory consumption by **25%** on high-volume document streams.
- Delivered **20+ REST APIs** and a **React.js** real-time document preview system, improving client load time by **20–40%**.

IdahoSTARS

.NET Core 8 · Angular

- Led **.NET Framework 4.5** to **.NET Core 8** migration, delivering **100+ REST APIs** and **20+ Angular** features with **SQL Server** performance improved by **20–40%** via indexing and stored procedure optimization.
- Configured **Azure DevOps CI/CD** across **3+** environments and authored architecture, schema, and API contract docs for cross-functional team alignment.

Netacent

.NET Core MVC

- Designed a **Helpdesk module** (50+ features) with **JWT authentication, Azure Blob Storage**, and an **AJAX-driven UI**, boosting user engagement by **25%** and reducing technical debt by **15%**.

Personal Projects

E-Commerce Platform GitHub

.NET Core · Angular

- Developed a **microservices-based e-commerce platform** with independent product catalog, cart, and order processing services using Clean Architecture and SOLID principles for scalable, maintainable deployments.

Taxi Booking Management System GitHub

.NET Core MVC

- Built a **ride-booking platform** with real-time driver matching, fare calculation, and payment gateway integration, optimizing T-SQL stored procedures to reduce average API response time by **40%**.

Recommendation Engine GitHub

.NET Core · React.js

- Developed a real-time recommendation engine that analyzes user preferences and order history to surface real-time meal suggestions, achieving a **30%** improvement in recommendation accuracy.

Certifications

- Microsoft AI-900: Azure AI Fundamentals

Education

Swami Keshvanand Institute of Technology

B.Tech Honours in Information Technology | SGPA: 9.18/10

2019 – 2023
